Wed, 05 Dec 2018 11:45:00 GMT carbonate sedimentology pdf - The objective of this chapter is to evaluate some of the proposed classifications of sedimentary carbonate rocks, and to present suggestions for naming and describing them. Fri, 07 Dec 2018 08:44:00 GMT Chapter 4 Classification of Sedimentary Carbonate Rocks ... - Sedimentology encompasses the study of modern sediments such as sand, silt, and clay, and the processes that result in their formation (erosion and weathering), transport, deposition and diagenesis. Sedimentologists apply their understanding of modern processes to interpret geologic history through observations of sedimentary rocks and sedimentary structures. Thu, 29 Nov 2018 19:37:00 GMT Sedimentology - Wikipedia - A carbonate platform is a sedimentary body which possesses topographic relief, and is composed of autochthonous calcareous deposits (Wilson, 1975). Platform growth is mediated by sessile organisms whose skeletons build up the reef or by organisms (usually microbes) which induce carbonate precipitation through their metabolism. Therefore, carbonate platforms can not grow up everywhere: they are ... Fri, 07 Dec 2018 14:13:00 GMT Carbonate platform - Wikipedia - (Presenterâ€™s notes

Daarmee bestaat kalksteen voornamelijk uit calciumcarbonaat (CaCO₃) en vindt men er regelmatig fossielen in terug (schelpen, ammonieten, e.d.). Blauwe hardsteen is bijvoorbeeld een vorm van fossiele kalksteen, bestaande uit de restanten van zeelelies.
