Thu, 06 Dec 2018 23:32:00 GMT References: H - University of Mississippi - Some of the major unsolved problems in physics are theoretical, meaning that existing theories seem incapable of explaining a certain observed phenomenon or experimental result. The others are experimental, meaning that there is a difficulty in creating an experiment to test a proposed theory or investigate a phenomenon in greater detail.. There are still some deficiencies in the Standard ... Fri, 07 Dec 2018 10:02:00 GMT List of unsolved problems in physics - Wikipedia - A white dwarf, also called a degenerate dwarf, is a stellar core remnant composed mostly of electron-degenerate matter.A white dwarf is very dense: its mass is comparable to that of the

Sun, while its volume is comparable to that of Earth.A white dwarf's faint luminosity comes from the emission of stored thermal energy; no fusion takes place in a white dwarf wherein mass is converted to energy.
